SUZUKI GSX750S KATANA

The Hamamatsu engineers, facing the anger of the Japanese public who could not buy the 1100 Katana shown at the IFMA, decide to launch a 750 version of project ED-2.

Indeed the Katana prototype flattered their national pride with its emblematical name – but its engine was just too big for the national laws!

Late in 1981, after the introduction of the exciting GSX1000S, Suzuki released an almost identical 750 cc version of the Katana (meaning Sword in English)
